User Documentation

To use the Senior Center App, begin by logging in. As an admin, you will then be able to add new members, list current members, delete members, and edit the information of current members. You are able to do the same with activities and users. Each of these functionalities can be found under the corresponding header at the top of the page. Additionally, the required forms can be found under the "Members" tab and there is also a report generation functionality. Lastly, report any bugs to GitHub under the "Issues" tab.
